

DELIVERING VALUE WITH PRODUCTS & SERVICE

VALUE PROPOSITION

PowerCare can provide the systems that make sense for your particular application or unique situation. Providing the right solution with products and service that best fit, regardless of manufacturer, is our way of doing business.

PRODUCT

PowerCare offers a broad product selection to ensure that you get the equipment that you prefer, that is approved at your site and that is specific to your industry.

ACCESSORIES

PowerCare also supplies all ancillary products required to create a complete reliable power package: power distribution, monitoring systems, spill containment, cabinets, cabling, disconnect switches and super structure.

CRITICAL POWER SOLUTIONS

EXCEEDING YOUR SERVICE EXPECTATIONS

A REPUTATION YOU CAN TRUST

Interstate Batteries built its reputation on its automotive battery brand and has extended its unmatched service and product in the power industry to include PowerCare. We have 50 years of battery experience and now offer our premier product, technical expertise and reliable service for backup and motive power. With Interstate, you get system installation and support at a competitive price based on value.

Interstate PowerCare provides reliable 24-hour service response for DC power systems utilized in uninterruptible power, telecommunications, motive power and switchgear. Having built a nationwide presence, Interstate has the ability and know-how to deliver power solutions anytime, anywhere.

TOTAL POWER SOLUTIONS PROVIDER

Depend on Interstate PowerCare, one of the largest battery suppliers and service organizations in the continental U.S. Rely on our expertise in battery technologies, customized maintenance programs or complete replacement of your critical DC Power systems. Count on our experience to seamlessly control the logistics, rigging, removal and installation of any DC Power system at any location.

INDUSTRIES SERVED

- Data Centers • Financial/banking • Government • Insurance • Utility
- Petro-chemical • Telecommunications • Medical • Manufacturing
- E-commerce • Education • Cable TV

TOTAL INTEGRATED SERVICES & TURNKEY INSTALLATION

Meeting or exceeding your expectations is PowerCare's prime mission. PowerCare's single point of responsibility relieves you of coordination efforts and costly delays, minimizing the total project time. We deliver value by providing comprehensive services before, during and after the installation of a system. This requires several elements not commonly offered by one company:

- reliable, professional project managers
- dedicated trained installation staff
- electrical and mechanical consulting engineers
- vast array of proven contractors
- total responsibility for the system

CRITICAL POWER SOLUTIONS

UNPARALLELED SERVICE

24/7/365 SERVICE & EMERGENCY RESPONSE

We can offer custom-tailored maintenance programs and emergency services:

- more than 50 locations nationwide
- highly experienced, factory-trained & certified field technicians

Our field technicians have been certified by the original manufacturers of the equipment that we deliver. We are adept in all aspects of the Critical Power System to return you to fully operational status in the shortest time.

KEEPING IT GREEN

In keeping with our single point of responsibility, PowerCare offers complete removal, disposal, reclamation and recycling services that comply with all local, state and federal guidelines including IEEE and EPA. Our confidence is supported by a separate insurance rider underwritten by AIG North American that completely indemnifies our clients with survivability. Each disposal is provided with an EPA certificate of recycling compliance for your peace of mind.

SCOPE OF SERVICES

- Installations
- Engineering
- Safety Compliance
